

## Phillips 66 Procurement – Humber Procurement and Pre-qualification Process

# Phillips 66 – Humber Refinery - Procurement Overview

## Base business and Humber Zero (HZ) procurement support

- UK team based at Humber provides procurement support to Refining and Marketing for day to operations, maintenance, Turnarounds and Projects for all materials, equipment and services
- Services cover the provision of all on and off-site services including construction, provision of professional services and consultancy
- Major equipment and materials covers everything from compressors, columns, air coolers, fin fans, piping, valves, nuts, bolts and gaskets, PPE and everything in-between. The main focus today for HZ is major equipment and piping materials.
- For HZ Phillips 66 Limited selected Worley UK Limited (Manchester) to provide project design, engineering, management and procurement services for the FEL 2 phase of the project to support the Phillips 66 Limited HZ Project Team
- Phillips 66 Limited Procurement work closely with VPI in respect to HZ but VPI has its own in-house procurement team.

# Pre-qualification Process – On-site Service Contractors

- **ISNetworld** manages the pre-qualification process for all Contractors who wish to work on-site at the Humber Refinery or its off-site facilities. Achieving and maintaining an acceptable grade is mandatory to being awarded and retaining contracts for on-site work
- Contractors are required to register with ISN and provide a cross-section of information e.g. HSE and quality policies and procedures, HSE statistics, company & financial information, insurances, etc
- The information provided is then reviewed against Phillips 66 Limited requirements and a grading given under the Phillips 66 Limited assessment process. If already registered with ISN this may be different to the grading as assessed by another client
- Only Contractors with grades A or B may be awarded work
- The fee charged by ISN depends on the size of the company(number of employees). If already registered the fee for registration under Phillips 66 Limited is lower than a new registration
- If you would like to register interest in being considered for work by Phillips 66 Limited, please use the QR code and complete the online form

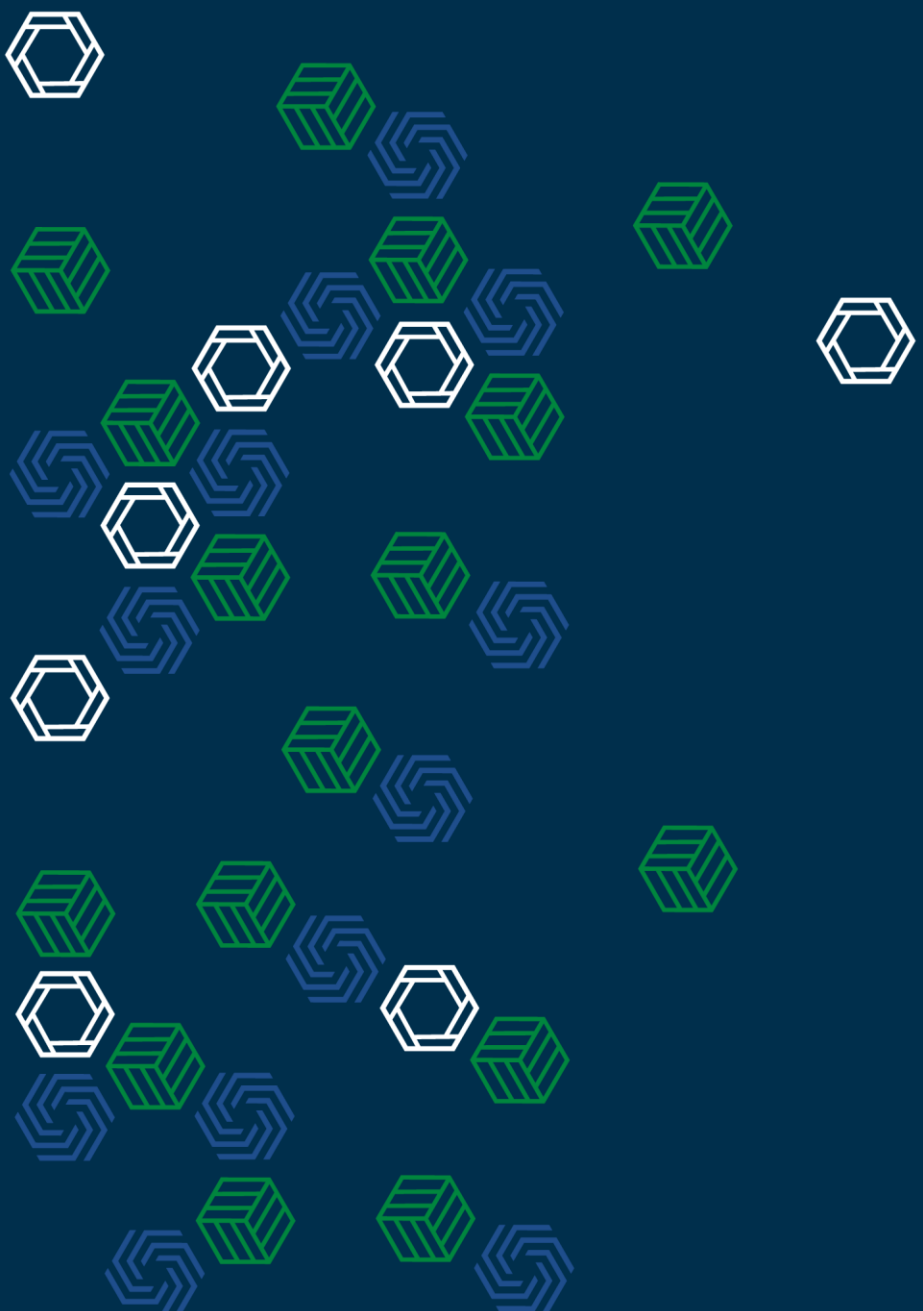

# Pre-qualification Process – Suppliers

- Phillips 66 Limited maintains a corporate Approved Manufacturers & Fabricators List
- Approval is mandatory for the provision of fabricated equipment and materials to Phillips 66 Limited
- If you wish to be considered for inclusion as an approved manufacturer or fabricator for the following types of equipment send your information using the QR code below
